Base Document:

Purpose:
WirelessHUMAN Agenda and Activity, Closing Plenary, IEEE 802.16 Session #12

Notice:
This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:
The contributor grants a free, irrevocable license to the IEEE to incorporate text contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE’s name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE’s sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:
The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures (Version 1.0) <http://ieee802.org/16/ipr/patents/policy.html>, including the statement “IEEE standards may include the known use of patent(s), including patent applications, if there is technical justification in the opinion of the standards-developing committee and provided the IEEE receives assurance from the patent holder that it will license applicants under reasonable terms and conditions for the purpose of implementing the standard.”

Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <mailto:r.b.marks@ieee.org> as early as possible, in written or electronic form, of any patents (granted or under application) that may cover technology that is under consideration by or has been approved by IEEE 802.16. The Chair will disclose this notification via the IEEE 802.16 web site <http://ieee802.org/16/ipr/patents/notices>.
TG4 PHY Activities

- Agreements on several issues:
  - FFT, Channel Bandwidth, etc.
- Draft generation progress ongoing
  - 12 specific sections need text generation
  - Input to TG4 MAC team on 04/06/01
  - Draft & Call for Comments deadline 04/16/01
  - Conference call on 04/18/01 (tentative date)
TG4 MAC Activities

• Held joint meetings with TG1/TG3
  – Agreed on a new TG1 generic header format
  – Reviewed issues on ARQ, concatenation, fragmentation, etc.
  – Input to TG4 PHY team on 04/06/01
  – Draft generation progress ongoing
  – Draft & Call for Comments deadline 04/16/01
TG4 Coexistence Activities

• Julius Knapp FCC meeting
• Formation of Wireless Advisory Group
  – Co-chairs from 802.11, 802.15, and 802.16
  – Individual WGs vote on issues
• MOTIONS
  – Support 6th Criteria of coexistence for 802 wireless projects as proposed by 802.11 & 802.15
  – Approve informative letter to ITU-R on coexistence
To: Study Group ITU-R JTG 4,7,8,9, Working Party 7C, and JRG 8A-9B
From: Roger Marks, Chair IEEE802.16
Date: 14 March 2001

This letter is intended to inform the current ITU-R preparatory studies for the WRC 2003, Agenda item 1.5, Resolution 736{GT PLEN-2/1} (WRC 2000) about the activities related to the development of a standard for license-exempt Broadband Fixed Wireless Access systems in the 5 to 6 GHz bands. The WirelessHUMAN™ (Wireless Highspeed Unlicensed Metropolitan Area Network) is one such standard that is being developed under the auspices of the IEEE 802.16 Task Group 4 (TG4).

Systems based on the WirelessHUMAN™ standard may share the bands that the 1997 World Radiocommunications Conference (WRC ’97) allocated on a world wide-primary basis for Earth Exploration Satellite Services (EESS) and Space Research Services (SRS), including Synthetic Aperture Radars (i.e., SAR 1-4) active space-borne sensors, in the 5 to 6 GHz band. The IEEE 802.16 TG4 is aware of the above coexistence issues and would welcome mutual efforts to address these issues.

The attached IEEE 802.16.4 Project Authorization Request describes the mission of TG4. In addition, further information about this project can be obtained at http://ieee802.org/16/tg4.
